

Energy Use Policy Statement

Leinster Reinforcements Ltd (LRL) seeks to be as responsible in its use of energy as possible. We aim to promote energy efficiency throughout our operations, and reducing our use of energy resources. We also promote this policy for its importance in good energy management for the economic, environmental well-being and social betterment of our stakeholders. LRL IS committed to;

1. Monitoring and reducing our Greenhouse Gas emissions
2. Improving our energy performance
3. Reducing utility costs
4. Reducing the use of fossil fuels

LRL adopts the continual improvement mantra and via the implementation of this policy we will;

1. Set objectives, targets and develop energy action plans
2. Managing energy use on an ongoing basis and using the information to regularly review our policy, objectives and targets
3. Train our staff on energy use, encouraging and supporting staff to act in line with this and other policies.

LRL will comply with all relevant law and regulatory directives and appropriate codes of conduct. This compliance extends to all relevant policies and commitments.
